

NWAOHIRI EMMANUEL UZODINMA

Frontend Developer

Lagos, Nigeria • emmanuelnwohiri1@gmail.com • 07066079012 (WhatsApp) / 09118336065

GitHub: github.com/Emmanuel-Xs

PROFESSIONAL SUMMARY

Frontend developer with full-stack capability through Next.js and TanStack Start, specializing in React and TypeScript. Experience spans production dashboards, a fintech web app (SmartPay, built during an internship), and full-stack personal projects like DevLink, a social-link aggregator, alongside lighter builds like the game Password Puzzle. Spent my NYSC service year as a web development and web design instructor at New Horizons Abeokuta, and through my PPA served as NYSC SAED ICT Trainer teaching corps members how to leverage AI to build portfolio websites, professional studio-style portraits, flyers, and posters.

CORE SKILLS

- | | | |
|---------------|---------------------|------------------------|
| • React | • Tailwind CSS | • Git/GitHub |
| • TypeScript | • Zustand | • REST API Integration |
| • Next.js | • TanStack Router | • Paystack Integration |
| • React Query | • Responsive Design | • Technical Teaching |

EXPERIENCE

Frontend Developer (Contract) | 01 Technologies — 01POS 2025 – Present

- Built AI-powered admin dashboard features: AI Insights and Restock Pro for a React-based POS system, integrating a Laravel backend via React Query for data fetching, caching, and mutations.
- Implemented Paystack billing flows including subscription plan upgrades and downgrades, and added Google reCAPTCHA v3 to the signup flow to reduce spam/bot signups.
- Built and shipped the AI feature page on the 01POS marketing/landing site (Vite + React), including fullpage.js scroll sections, a reusable IntersectionObserver-based scroll-reveal hook, and mobile-responsive layout fixes.

Web Development & Web Design Instructor (NYSC) | New Horizons Nigeria, Abeokuta Branch 2025 – July 2026

- Posted to New Horizons Nigeria as Primary Place of Assignment (PPA) for NYSC service; taught web development and web design to students throughout the service year.

SAED ICT Trainer (NYSC Orientation Camp) | New Horizons Nigeria and NYSC Partnership 2025

- Taught ICT web development, web design, graphic design, and applied AI to corps members during the NYSC orientation camp, through New Horizons' partnership with NYSC's SAED (Skill Acquisition and Entrepreneurship Development) programme.
- Taught practical, applied-AI workflows: leveraging AI tools to build portfolio websites, generate professional studio-style portraits, and design flyers and posters.
- Designed and delivered structured lessons combining live coding demonstrations with hands-on project prompts (e.g. Rock Paper Scissors, Calculator, Reaction Speed Test).
- Built public speaking and classroom facilitation skills through regular in-person teaching to learners of varied skill levels.

Frontend Developer (Intern) | Hello World Technologies, Onipanu, Lagos 2023

- Contributed to development of the SmartPay website.
- Collaborated on the SmartPay mobile application using React Native.

PROJECTS

Invoiq (Full-stack invoice management app — HNG14 internship) — github.com/Emmanuel-Xs/invoiq

- Built with Vite, React, TypeScript, TanStack Router, and TanStack Form v1 with Zod validation; state managed via Zustand with persistence.
- Styled with Tailwind CSS v4 and shadcn/ui, implementing a custom design system based on a Frontend Mentor Figma spec.

DevLink (Full-stack link aggregator) — github.com/Emmanuel-Xs/devlinks

- Built a web app for collating and sharing users' social media links, using Next.js and Tailwind CSS.

Password Puzzle (v2) *(Ongoing — rebuild of a 2023 project)* — github.com/Emmanuel-Xs/password-puzzle

- Rebuilt a Mastermind-style browser game on a modern stack: Vite, React, TypeScript, Zustand, Tailwind v4, and shadcn/ui.
- Designed a six-tier difficulty system with distinct attempt limits, hint pools, and live feedback toggling for varied skill levels.

IdeaVault *(Ongoing — personal idea management platform)*

- Building with TanStack Start, Better Auth, Drizzle ORM, and Supabase/Turso for structured, persistent idea capture and organization.

Get Nigerian Network Provider *(npm package)* — github.com/Emmanuel-Xs/get-nigerian-network-provider

- Published Node.js package that identifies Nigerian mobile network providers from phone number prefixes.

EDUCATION

B.Sc. in Computer Science

University of Nigeria, Nsukka (UNN) — Graduated
